COMMENTS ON ALLOWANCE

DATE: March 8, 2007

TO THE ASSISTANT COMMISSIONER FOR PATENTS:

While the combinations of elements recited in the allowed claims are patentable, the undersigned would like to point out that some or all of these individual elements may be broadened such that the resulting combination is still patentable. Applicants may elect to pursue such claims, or to pursue claims directed to other aspects of the present invention, through a continuation or reissue application, or through a reexamination proceeding as appropriate.

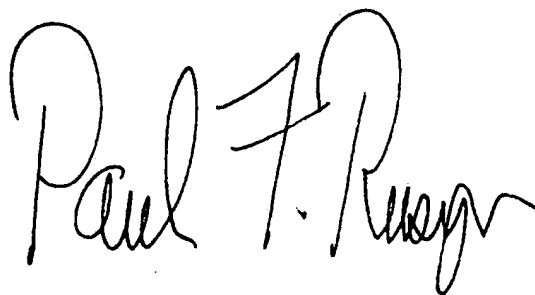

Moreover, although claims 1 and 22 were cancelled during prosecution of the present application, this was done merely to expedite allowance of the present

application and not because the undersigned agrees that these claims are not patentable over the art of record. The language of claims 1 and 22 is believed to distinguish over the art of the record and thus the cancellation of these claims should not adversely limit any future equivalents analysis of the allowed claims under the Doctrine of Equivalents.

DATED this 8th day of March, 2007.

Respectfully submitted,

GRAYBEAL JACKSON HALEY LLP
